

Our Team

Leonardo Academy has an experienced team of professionals ready to assist you with any tenant sustainability project. Our team of LEED Accredited Professionals has experience with implementing sustainability and LEED in multi-tenant buildings and working with both tenants and building owners. Let us help you bring sustainability to your tenant space.

Many options exist for greening tenant spaces, including low cubicle panels to allow more light, incorporating a recycling policy, and sustainable purchasing.

We help clients make their office space more sustainable.

As a tenant in a multi-tenant building, the path toward sustainability is not always clear or even entirely within your control. Leonardo Academy can facilitate a clear roadmap to sustainability for both large and small spaces that fits your scope of control. We provide clients with the right tools to master the complexities of sustainability and ensure effective progress toward your sustainability goals and long-term value.

We can assist with implementation and reporting at any level, whether it is an internal sustainability program, part of a building-wide effort, or implementation of a corporate program. We can assist tenants with providing data to building management for LEED-EB certification or reporting to the corporate office. We can help with providing underlying data for corporate sustainability reporting, such as the Global Reporting Initiative (GRI). We can work with building owners and managers to bring tenants to the table and involve them in the sustainability process.

There is no tenant too large or too small. We work with single-occupancy tenants and tenants in multi-occupant buildings. Our sustainability metrics are comprehensive and cover all aspects of sustainability.

Path to Sustainability

Our experienced team members will take you through the sustainability process step-by-step. We work with you to determine your goals and objectives for the sustainability initiative. We conduct an initial assessment to help you identify your current sustainability practices and thus help to prioritize your goals. Leonardo Academy will develop a strategic plan and assist with implementing a sustainability program that is right for you. We provide reporting that summarizes your achievements and highlights areas where more focus is needed.

Overview of Benefits

- Identification of green regulations and incentives applicable to your location
- A sustainability plan that is developed to meet your needs and goals
- Policies and plans tailored to leased space and your organization
- Tools for performance tracking of key metrics of special interest to you
- Sustainability training for key stakeholders
- Third-party evaluation and monitoring of sustainability metrics to guide a continuous improvement program
- Achievement reporting to track progress or contribute to larger corporate sustainability initiatives and reports
- Green lease assistance
- Communication with property management to gather relevant building data to assist with your sustainability footprint
