

Sustainability Standards Development

LEO

Leonardo Academy is an accredited standards developer through the American National Standards Institute (ANSI). We develop voluntary, consensus-based standards to help guide sustainability actions and to help create competitive markets for sustainable goods, services and organizations.

Leonardo Academy ANSI-Approved Standards

- Emission Inventories, Offsets and Reduction Credits Standard (LEO-5000)
- Standard for Sustainable Electronic Gaming Machines (LEO-8000)

Leonardo Academy Standards Under Development

We are currently developing the following Leonardo Academy standards using the ANSI process:

- Sustainable Organizations (LEO-1000)
- Sustainable Agriculture (LEO-4000)
- Sustainable Vehicles (LEO-6000)
- Sustainable Events (LEO-7000)
- Type III Life-Cycle Impact Profile Declarations for Products and Services (LEO-SCS-002)

Past Standard Development Activities

Leonardo Academy played a leading role in the development of the U.S. Green Building Council's LEED for Existing Buildings (LEED-EB) rating system, one of the most successful standards for driving sustainability through the building sector. For more information, visit: <http://www.leonardoacademy.org/services/buildings/leedr-for-eb.html>.

How to Participate in Leonardo Academy's Standards Development Projects

Leonardo Academy is always looking for individuals and organizations to participate in our standard development processes, to pilot-test draft standards and to sponsor our standard development work. For more information or to learn how to get involved, visit: <http://www.leonardoacademy.org/services/standards.html>

The American National Standards Institute (ANSI)

ANSI was founded in 1918 to coordinate voluntary standards and conformity assessment activities in the United States. The ANSI standards development process provides a forum for the private and public sectors to cooperatively work together toward the development of voluntary national consensus standards. American National Standards impact product development, quality and environmental performance and provide a means for the U.S. to influence global standardization activities and the development of international standards. ANSI continuously evolves to meet the challenges of the global marketplace and the demands of its constituents. (www.ansi.org.)

Leonardo Academy – Accredited Standards Developer

Leonardo Academy is a member of ANSI and has been an ANSI-Accredited Standards Developer since 2006. We believe that standards for sustainability performance are critical for achieving sustainability goals.
