Leonardo Academy is a non-profit organization with deep sustainability experience. Leonardo Academy president Michael Army was the chair of the USGBC committee that developed the LEED for Existing Buildings (LEED-EB) rating system; Leonardo Academy managed the LEED-EB pilot for the USGBC and conducted all LEED-EB certification reviews for the USGBC from 2002 to October 2007. Leonardo staff members continue to conduct LEED certification reviews to the present day, while also maintaining a robust LEED consulting practice. Leonardo Academy is also an American National Standard Institute (ANSI) accredited standards developer. We have developed the American National Standard for Emissions Inventories, Reduction Credits and Offsets (LEO-5000) and the American National Standard for Sustainable Gaming (LEO-8000) . We are currently finishing the development of national standards for Sustainable Agriculture (LEO-4000) and Life-Cycle Assessment (LEO-SCS-002).

“Leonardo Academy is pleased to provide these training sessions to advance sustainability. Please contact Leonardo Academy if you have any questions about this sustainability training or if you are interested in support for sustainability strategy development, implementation, or ongoing performance,” said Michael Army, President of Leonardo Academy.
