

Sustainability Services for Your Company and for Your Company's Greenbuild Exhibit

[Leonardo Academy](#) can help you with your company's sustainability strategy. We provide comprehensive sustainability services.

For Your Company

üOrganizational sustainability assessments and strategies

üEmissions inventories; reduction and offset strategies

üGreening of new and existing buildings

üSupply chain and waste management

üReporting: Annual sustainability reports, Carbon Disclosure Project reports, [Walmart supplier questions](#), etc.

For Your Greenbuild Exhibit Booth

The U.S. Green Building Council's (USGBC) green exhibitor guidelines are mandatory for Greenbuild 2010.

Leonardo Academy can help you make your exhibit operations more sustainable to meet and go beyond the USGBC exhibitor requirements.

üSustainable policies for your exhibit and for your company

üand offsetting the overall emissions impacts of your exhibit

ü Sustainable approach to outreach materials and promotional items

ü Documenting the sustainability of exhibit operations

Leonardo Academy's Experience

Leonardo Academy is a charitable nonprofit organization that has extensive experience with sustainability, green buildings and Greenbuild. Since the first Greenbuild in 2002, we have calculated for

the USGBC the emissions caused by the entire Greenbuild event and recruited donations to offset those emissions. We have been an exhibitor at Greenbuild every year since its inception. We also played a key role with the USGBC in developing and implementing

LEED-EB. We have years of experience providing sustainability services to companies large and small. We can help your company advance its sustainability, and document its achievements.
