- S&B Trust
- Sequent
- Signet
- U.S. EPA
- U.S. Green Building Council
- Wisconsin Dept. of Natural Resources
- Wisconsin Dept. of Administration

Buildings We've Helped Achieve LEED® Certification

Additional Services & Programs

Cleaner & Greener®
Leonardo Academy's Cleaner & Greener® Program provides certification of the level of emission reductions (and efforts achieved) by events, companies, organizations, buildings, or individuals. For events we work with event organizers to quantify, reduce and offset emissions (e.g. the event) including emissions from event space energy use as well as participant travel, lodging and meals.

Green Supply Chain and Waste Management
Leonardo Academy helps companies and organizations develop, implement and track achievement of green procurement, supply chain and waste management programs. Start getting your supply chain and waste management budget!

Sustainable Land Management
Leonardo Academy assists businesses in developing and implementing plans for sustainable land management, restoration and preservation. Our services include site assessment, consulting for management and restoration. Preservation activities including grass species monitoring, prescribed burning, brush and exotic species control, weed control, prairie planting, tree planting and other activities. We assist landowners in identifying and applying for resources available to support these activities.

Sustainability Certification Standard Development
Leonardo Academy is an ANSI-accredited standard developer and is currently developing standards for sustainable organizations, emissions inventories, reduction credits and offsets, sustainable green organizations, sustainable events, sustainable vehicles, sustainable agriculture, and a life cycle impact profile declaration for products, services and systems.

Sustainable Living for Families and Individuals
Leonardo Academy provides a free guide to families and individuals on how to live more sustainably, including tips on repairing, buying, vehicles and maintaining yards with reduced environmental impact. We also help families and individuals offset emissions caused by their homes, transportation, and lifestyle. Visit our "WorldGreen" website for more information (www.worldgreen.org)
